

**REMARKS**

Claim 1 is pending in the application. The Office Action does not contain any rejections of claim 1, but requests that the certain amendments to claim 1 be accompanied by “specific pointers for support” within the original specification, claims, and/or drawings. Below is a table identifying specification support for each of the identified claim limitations.

<b><u>Claim Limitation</u></b>	<b><u>Specification Support</u></b>
receiving, by a computer system and for addition to a collections account that it maintains on behalf of the SPV, an electronic payment from the power distributor for at least one of the specified periods in the revised power contract, and wherein the computer system comprises a programmed processor and operatively associated memory;	Figure 6 and ¶ [0080] disclose a computer system that transfers funds to and from accounts for the SPV, including a collections account.  ¶ [0041] discloses that in periods of the power purchase agreement (PPA), payments received from the power distributor are deposited in the collections account.  ¶ [0048] further discloses that all payments to the SPV may be deposited in the collections account, whether from the power distributor pursuant to the revised PPA, or from the power supplier pursuant to the mirror PPA, or from the third party guarantor, or from the reserve account.  ¶ [0079] discloses that the computer system comprises a processor and a memory.
transmitting, by the computer system and from the collections account, for the at least one of the specified periods, an electronic payment to the power supplier pursuant to the mirror power contract;	¶ [0041] discloses that the SPV may pay the power supplier for the energy and energy capacity received from the power supplier with proceeds from the collections account under the mirror PPA.
transmitting, by the computer system and from the collections account, payments on at least one of interest and principal for the debt instruments issued by the SPV;	¶ [0042] discloses that the debt service (interest and principal) for the debt instruments may be financed by the excess cash that the collections account of the SPV has left over after a period of the revised PPA.
funding a reserve account, maintained by the computer system, wherein the computer system is configured to make a transfer payment from the reserve account to the	¶ [0049] discloses the funding of a reserve account. Figure 6 and ¶ [0080] disclose that the reserve account is maintained by the

<p>collections account in the event of a collections account shortfall for paying at least one of interest and principal on the debt instruments, and to make a transfer payment from the collections account to the reserve account to replenish the reserve account to at least a reserve required balance; and</p>	<p>computer system.</p> <p>¶ [0049] disclose that the purpose of the reserve account may be to provide the trust with sufficient funds to make principal and interest payments when due on the debt securities.</p> <p>¶ [0049] further discloses that if funds are withdrawn from the reserve account to make a payment on the debt securities, the reserve account may be replenished subsequently to the reserve required balance with funds from the collections account.</p>
<p>maintaining, by the computer system a damages and indemnity account, wherein the computer system is configured to, upon a damages, termination or indemnification condition, receive from the power supplier at least one of a damages, termination and indemnity amount, and to pay to the power distributor a corresponding amount.</p>	<p>¶ [0052] discloses that if the SPV is required by the terms of the revised PPA to pay damages, termination or indemnity amounts to the power distributor, such payments are paid from the SPV's damages and indemnity account, and the power supplier may be required to pay similar amounts to the SPV under the mirror PPA.</p> <p>Figure 6 and ¶ [0080] disclose a damages and indemnity account maintained by the computer system.</p>

The paragraph citations in the table above refer to the paragraph numbering in the specification as originally filed.

The Office Action states that Figures 5 and 6 and the accompanying description in ¶¶ [0076]-[0080] “do not appear to support these claim limits...” As indicated in the table above, however, support for the claim amendments can be found, for example, in ¶¶ [0041] to [0052] of the specification.

Applicants submit that claim 1 is support by the specification as originally filed and that claim 1 is in condition for allowance.

Respectfully submitted,

Mark G. Knedeisen
